

Voice Captioning Ordering Information

Required Hardware and Software

Computer: Because of the demands placed on the computer by Dragon NaturallySpeaking and the online classroom scenario, students must have a computer containing an i7 processor, either a solid state hard drive or 7200 rotational speed hard drive, and **16 to 32 gigabytes of memory (RAM)**.

1. *Sennheiser ME 3-EW Headset Microphone for Wireless Systems
2. *Andrea PureAudio USB-SA USB Sound Card
3. Dragon Professional v14 (for Students starting during the Fall 2016 semester)
4. A set of external speakers which connect to the sound card of the computer and have a jack in front for ear buds or a headset; purchase the least expensive you can find, usually \$25-\$35. These are used for playback of your dictated audio because there is usually a manual volume control on the front of the speakers.
5. Ear buds or headset to plug into the speakers above; inexpensive sets are fine; some use iPod ear buds. Some sets can be purchased at Wal-Mart for approximately \$10.

*Advantage Software is offering these items at a discount in bundles with or without a laptop computer. Ordering information can be found at the end of this document.

Note: You will need to have your computer, Dragon software, microphone, sound pod, ear buds, and external speakers by the first day of class. Do not install Dragon without following the step-by-step instructions in your textbook which are specific and configured to meet the needs of this course.
